DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas M. Lundin on 03/29/07.

The application has been amended as follows:

Cancelled claim 18.

Allowable Subject Matter

2. Claims 1, 3, 5-17 allowed.

The following is an examiner's statement of reasons for allowance:

For claims 1, 5, 7, 8, 9, the prior art does not teach in singularly or combination the steps of:

logging of a variation with time of the values of the parameter concerned,

determination of a base value for the parameter concerned,

determination of an instantaneous deviation between the base value and the current parameter value or a current mean value of a specified group, containing the current parameter value, of consecutive parameter values,

Art Unit: 2863

creation of a baseline representing the base value,

display of the baseline on the viewing screen in such a way that the baseline extends horizontally on the viewing screen and with a specified length,

creation of a continuous curve that represents the variation with time of the parameter values for a specified time period and is normalized with respect to the baseline,

display of the continuous curve on the viewing screen in such a way that the continuous curve's time axis extends horizontally on the viewing screen and that the continuous curve on the viewing screen essentially extends over the entire length of the baseline,

creation of a deviation bar that represents the instantaneous deviation and is normalized with respect to the baseline,

display of the deviation bar on the viewing screen in such a way that the deviation bar extends vertically on the viewing screen from the level of the baseline; wherein the datum-line display has a trend arrow that is generated as follows:

determination of the trend of the value variation with time in the current parameter value,

creation of the trend arrow, which represents the trend,

display of the trend arrow in the viewing screen and wherein the trend arrow is displayed on the viewing screen in such a way that the trend arrow points upward in the case of a positive instantaneous slope and points downward in the case of a negative instantaneous slope.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
